

This is a title and this is too

Author's name¹ and Second author's name²

¹⁾ *Author's affiliation*^{a)}

²⁾ *Second author's affiliation*

(Dated: 26 July 2021)

1 Put your abstract here. Abstracts are limited to 200 words for regular articles and
2 100 words for Letters to the Editor. Please no personal pronouns, also please do not
3 use the words **new** ' ' **and/or** novel” in the abstract. An article usually includes an
4 abstract, a concise summary of the work covered at length in the main body of the
5 article.

^{a)} e-mail@uni.edu; other info

FIG. 1. Caption.

I. INTRODUCTION

This sample document demonstrates the use of JASA in manuscripts prepared for submission to the Journal of the Acoustical Society of America.

II. FIGURES

The only figure formats allowed for submission are the following: .pdf, .ps, .eps, or .jpg. Figure files must be named in this fashion: Figure\#.xxx, where \# is the figure number and xxx is the file format (Figure1.eps, Figure2.jpg, Figure3a.ps, Figure3b.ps, etc).

III. INLINE AND DISPLAY MATH SAMPLES

You can also include inline math, like $\sum_{i=1}^N a_i$.

The following is a matrix.

FIG. 2. A sine wave.

$$A_{m,n} = \begin{pmatrix} a_{1,1} & a_{1,2} & \cdots & a_{1,n} \\ a_{2,1} & a_{2,2} & \cdots & a_{2,n} \\ \vdots & \vdots & \ddots & \vdots \\ a_{m,1} & a_{m,2} & \cdots & a_{m,n} \end{pmatrix}$$

IV. CITATIONS

The code `[@key]` should usually be used for making citations surrounded by parentheses, where `key` is the BibTeX cite-key. If you need only the year in parentheses, you may use `@key`.

Some examples:

- Normal journal cite: (Christian *et al.*, 1984)
- Volume number with issue number: (Webster and Klumpp, 1962)

- Journal article published online, not yet printed: (published online, [Luizard and Pelor-son, 2017](#))
- Book reference: ([Hollman, 1997](#))
- In press: (in press, [Smith, 2011](#))
- Website: ([Boersma and Weenick, 2005](#))
- Inproceedings: ([Werner and Borke, 2001](#)).

To start the appendix, use the `\appendix` command. This signals that all following section commands refer to appendixes instead of regular sections. Therefore, the `\appendix` command should be used only once—to set up the section commands to act as appendixes. Thereafter normal section commands are used. The heading for a section can be left empty. For example,

```
\appendix

#
```

will produce an appendix heading that says “APPENDIX A” and

```
\appendix
```

```
# Background
```

38 will produce an appendix heading that says “APPENDIX A: BACKGROUND” (note
39 that the colon is set automatically).

40 If there is only one appendix, then the letter “A” should not appear. This is suppressed
41 by using the star version of the appendix command (`\appendix*` in the place of `\appendix`).

42 **APPENDIX A:**

43 Observe that this appendix was started by using

```
# A little more on appendices
```

44 Note the equation number in an appendix:

$$E = mc^2$$
